language and the timeless way of building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns now in the nature of order alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities in the phenomenon of life the first volume in this four volume masterwork alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture with this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region he introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built alexander argues that living structure is at once both personal and structural taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart a step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united

maintaining the substance that made introduction to the thermodynamic of materials a perennial best seller for decades this sixth edition is updated to reflect the broadening field of materials science and engineering the new edition is reorganized into three major sections to align the book for practical coursework with the first thermodynamic principles and second phase equilibria sections aimed at use in a one semester undergraduate course the third section reactions and transformations can be used in other courses of the curriculum that deal with oxidation energy and phase transformations the book is updated to include the role of work terms other than  $pV$  work e.g. magnetic work along with their attendant aspects of entropy maxwell equations and the role of such applied fields on phase diagrams there is also an increased emphasis on the thermodynamics of phase transformations and the sixth edition features an entirely new chapter 15 that links specific thermodynamic applications to the study of phase transformations the book also features more than 50 new end of chapter problems and more than 50 new figures

the purpose of this book is to explore the ways in which the london underground tube was mapped by a number of writers from george gissing to virginia woolf from late victorian london to the end of the world war ii underground writing created an imaginative world beneath the streets of london the real subterranean railway was therefore re enacted in number of ways in writing including as dantean underworld or hell as gateway to a utopian future as psychological looking glass or as place of safety and security the book is a chronological study from the opening of the first underground in the 1860s to its role in ww2 each chapter explores perspectives on the underground in a number of writers starting with george gissing in the 1880s moving through the work of h.g. wells and into the writing of the 1920s and 1930s including virginia woolf and george orwell it concludes with its portrayal in the fiction poetry and art including henry moore of ww2 the approach takes a broadly cultural studies perspective crossing the boundaries of transport history literature and london urban studies it draws mainly on fiction but also uses poetry art journals postcards and posters to illustrate it links the actual underground trains tracks and stations to the metaphorical world of underground writing and places the writing in a social political context
